2. The following is an examiner's statement of reasons for allowance: Regarding claim 1 the prior art of record fails to teach of a link controller for generating an asynchronous connectionless (ACL) link in accordance with output signals of the frequency table and the frequency hopping transceiver and for controlling selection of an operating mode between a channel avoidance scheme and a channel selection scheme and a packet handler for generating packet data by integrating a synchronous connection oriented (SCO) link and the ACL link inputted. The closest reference, Deutsch (U.S. Patent No. 5,848,095), teaches of an RF transceiver, modulation, demodulation, RSSI, and a synthesizer but fails to teach of a link controller for generating an asynchronous connectionless (ACL) link in accordance with output signals of the frequency table and the frequency hopping transceiver and for controlling selection of an operating mode between a channel avoidance scheme and a channel selection scheme and a packet handler for generating packet data by integrating a synchronous connection oriented (SCO) link and the ACL link inputted.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
